

### QPT-20 SERIES PAN & TILT POSITIONER

The QPT-20 Series of pan & tilt positioners is designed for a wide variety of sensor position applications. The QPT-20 Series is rugged and durable enough for virtually any environment, including port surveillance and mobile vehicle vision systems. Stepper motor models can handle up to 20 lb-ft. of torque for heavier payloads. The brush motor QPT-20 models can handle payloads up to 8 lb-ft. Both provide

tabletop load mounting for multiple sensor array applications. Digital Integrated Control (IC) units communicate via network interface or through a dedicated controller. If preferred, an analog unit is available as an effective solution where simple direction control is required without a PC.

#### AVAILABLE FEATURES

- Payloads up to 20 lb-ft. (27.1Nm) on stepper motor models, 8 lb-ft. (10.8Nm) on brush motor models
- Analog driven or digital integrated controller (IC) models
- Fixed, inverted or mobile installations
- Mil-Spec connectors
- Tough aluminum housing and hardened steel gearing for durability in harsh environments
- Marine configuration that meets IP-66 standards
- Shock & vibration mil-spec tested

#### SENSOR INTEGRATION

- Multi-Spectrum cameras (Visible / NIR / SWIR)
- Thermal imagers (LWIR)
- IR and visible illuminators
- Laser range finders
- Communication antennas
